## Is your house making you sick?.....16

## Chapter 1: Why we need to act ..... 24

|  |           |
|--|-----------|
| • <b>The true cost of progress</b> .....                                 | <b>26</b> |
| • <b>The four dog defence</b> .....                                      | <b>27</b> |
| • <b>Genetics loads the gun, the environment pulls the trigger</b> ..... | <b>30</b> |
| • <b>Why we need to act</b> .....  | <b>32</b> |
| • <b>What we need to do</b> .....  | <b>35</b> |
| • <b>What is Building Biology?</b> .....                                 | <b>38</b> |

## Chapter 2: Allergens ..... 40

|   |           |
|---|-----------|
| • <b>Allergies and the gut microbiome</b> .....       | <b>43</b> |
| • <b>Allergens in the home</b> .....                  | <b>47</b> |
| 1. House dust mites .....                             | 47        |
| 2. Pet allergens .....                                | 52        |
| 3. Pest allergens .....                               | 54        |
| 4. Plant allergens .....                              | 58        |
| 5. Chemicals that may trigger allergies .....         | 61        |
| 6. Mould, biotoxins and water-damaged buildings ..... | 62        |
| • <b>Disease causing germs</b> .....                  | <b>84</b> |
| • <b>Creating a low allergy home</b> .....            | <b>86</b> |
| 1. Identify the source of exposure .....              | 86        |
| 2. Lower humidity levels .....                        | 87        |
| 3. Reduce the dust load .....                         | 87        |
| 4. Improve ventilation .....                          | 91        |
| 5. Use radiant heat to warm the home .....            | 91        |
| 6. Use an allergy friendly vacuum cleaner .....       | 92        |
| 7. Use an air purifier .....                          | 93        |
| 8. The role of plants .....                           | 98        |

## Chapter 3: Chemicals (toxicants).....100

|   |            |
|---|------------|
| • <b>Toxins are everywhere, and in everyone</b> .....                 | <b>102</b> |
| • <b>Chemical testing and exposure standards are inadequate</b> ..... | <b>103</b> |
| • <b>Who is susceptible to toxicants?</b> .....                       | <b>105</b> |
| • <b>Health effects attributed to toxicants</b> .....                 | <b>108</b> |
| • <b>Toxicants in the home</b> .....                                  | <b>110</b> |
| • Air fresheners, fragrances, perfume and incense .....               | 110        |
| • Baby bottles, sippy cups, dummies and teats .....                   | 113        |
| • Bedding .....   | 115        |
| • Building materials .....  | 118        |
| • Cleaning products .....   | 119        |
| • Clothing .....  | 126        |
| • Cookware .....  | 129        |
| • Environmental tobacco smoke (ETS) .....                             | 131        |
| • Food packaging and bottles .....                                    | 131        |
| • Furnishings .....   | 135        |
| • Hair products .....   | 138        |
| • Heating sources .....   | 140        |
| • Kettles and urns .....  | 140        |
| • Makeup .....  | 141        |
| • Personal care products .....  | 145        |
| • Pesticides .....  | 155        |
| Dealing with pests in the home .....                                  | 161        |
| • Plastics .....  | 168        |
| • Sunscreens.....   | 171        |
| • Tanning agents .....  | 173        |
| • Tattoos - Think before you ink .....                                | 174        |
| • Toys .....  | 175        |
| • Vehicle exhaust .....   | 177        |

## Chapter 4: Electromagnetic fields ..... 178

|  |            |
|--|------------|
| • <b>Terrestrial radiation versus man-made radiation</b> .....     | <b>180</b> |
| • <b>The electromagnetic field debate - friend or foe?</b> .....   | <b>182</b> |
| • <b>Types of electromagnetic fields in the home</b> .....         | <b>186</b> |
| • <b>Exposure standards and why they are inadequate</b> .....      | <b>190</b> |
| • <b>How electromagnetic fields affect the body</b> .....          | <b>195</b> |
| • <b>Health effects attributed to electromagnetic fields</b> ..... | <b>197</b> |
| • <b>Who is susceptible to electromagnetic fields?</b> .....       | <b>203</b> |
| • <b>Testing electromagnetic fields</b> .....                      | <b>204</b> |
| • <b>Sources of AC electromagnetic fields in the home</b> .....    | <b>207</b> |
| • Sources outside the home .....                                   | 207        |
| • Sources inside the home .....                                    | 209        |
| • <b>Sources of radiofrequencies</b> .....                         | <b>218</b> |
| • Sources outside the home .....                                   | 218        |
| • Sources inside the home .....                                    | 221        |
| • <b>Radioactivity</b> .....                                       | <b>231</b> |
| • Nuclear testing in Australia .....                               | 232        |
| • Radon gas .....  | 233        |
| • Health effects attributed to radioactive particles .....         | 234        |
| • Sources of radioactivity in the home .....                       | 235        |
| • Testing for radioactivity .....                                  | 237        |
| • Tips to reduce your exposure to radon gas .....                  | 237        |
| • <b>Sacred sites and geopathic stress</b> .....                   | <b>238</b> |
| • Geopathic stress zones .....                                     | 239        |
| • Health concerns .....  | 243        |
| • Signs of geopathic stress .....                                  | 244        |
| • Testing for geopathic stress .....                               | 244        |
| • Solutions.....   | 245        |

## Chapter 5: Drinking water ..... 246

|  |            |
|--|------------|
| • <b>Tap water</b> .....                           | <b>249</b> |
| • Aluminium .....                                  | 251        |
| • Asbestos .....                                   | 252        |
| • Chlorine and its by-products .....               | 252        |
| • Copper .....                                     | 253        |
| • Fluoride .....                                   | 255        |
| • Lead.....  | 259        |
| • Microorganisms.....                              | 262        |
| • Pesticides .....                                 | 263        |
| • Polyvinyl chloride .....                         | 264        |
| • Recycled waste water .....                       | 264        |
| • Water filter systems for tap water .....         | 266        |
| • <b>Tank water</b> .....                          | <b>267</b> |
| • Contaminants in tank water.....                  | 268        |
| • Choosing a water tank .....                      | 271        |
| • Water filter systems for tank water .....        | 273        |
| • <b>Bore and well water</b> .....                 | <b>273</b> |
| • Contaminants in bore/well water .....            | 274        |
| • Water filter systems for bore/well water.....    | 276        |
| • <b>Bottled water</b> .....                       | <b>276</b> |
| Concerns with bottled water .....                  | 277        |
| • <b>Water filters – are they necessary?</b> ..... | <b>279</b> |

## Chapter 6: Building and renovating ..... 282

|  |            |
|--|------------|
| • <b>Key principles to building a healthy home</b> .....                   | <b>284</b> |
| 1. Location, location, location .....                                      | 285        |
| 2. Identify health hazards before renovating or demolishing .....          | 295        |
| • Asbestos .....   | 295        |
| • Synthetic mineral fibres .....   | 296        |
| • Lead paint .....   | 297        |
| • Treated timber .....   | 297        |
| 3. Prevent condensation and mould-related problems .....                   | 298        |
| 4. Minimise exposure to harmful electromagnetic fields .....               | 306        |
| 5. Minimise exposure to harmful toxicants .....                            | 309        |
| 6. Choose heating and cooling systems suitable for allergy sufferers ..... | 314        |
| 7. Choose healthier lighting options .....                                 | 320        |
| 8. Implement integrated pest management control .....                      | 323        |
| • <b>Tips before you move into your new home</b> .....                     | <b>325</b> |

## Chapter 7: Checklists to assess the home ..... 332

|   |            |
|---|------------|
| • <b>Table 1: Site (land) checklist</b> .....           | <b>334</b> |
| • <b>Table 2: Allergy checklist</b> .....               | <b>335</b> |
| • <b>Table 3: Electromagnetic field checklist</b> ..... | <b>338</b> |
| • <b>Table 4: Drinking water checklist</b> .....        | <b>339</b> |

|                              |            |
|------------------------------|------------|
| <b>Useful websites</b> ..... | <b>340</b> |
|------------------------------|------------|

|                         |            |
